

RESELLING AND DISTRIBUTION

The cloud billing platform built for modern resellers

Automate billing from end to end—so you can eliminate manual reconciliation, protect margins, and scale your cloud resale business without scaling headcount.

True multi-cloud normalization

Normalize cost and usage across AWS, Azure, GCP, VMware, and Nutanix with FOCUS-compliant data that enables true side-by-side comparison.

Scale without growing your team

Automate the entire billing cycle—from cloud provider data ingestion to invoice generation—so you can handle more customers without increasing overhead.

Eliminate disputes before they happen

Ensure every invoice is accurate with policy-driven billing automation that eliminates errors, prevents escalations, and builds customer trust.

Protect margins automatically

Apply custom markups, discounts, and pricing rules at scale. CloudBolt enforces them with precision to eliminate revenue leakage and preserve profitability.

Launch new revenue streams

Offer value-added FinOps services like cost optimization, forecasting, and cloud advisory—powered by the same platform that automates your billing.

Feature highlights

Hierarchical multi-tenancy

Parent-child account structures with consolidated billing and reporting.

API-first architecture

Full REST APIs for integration with PSA, billing, and ITSM platforms.

Cloud program support

Support for resale programs including Azure CSP (Direct & Indirect), AWS SPP, and Google Partner Advantage.

Automated billing

Fully automate invoicing from ingestion to billing—cutting month-end processes from weeks to hours.

One platform, two revenue drivers

Automate your own billing and deliver FinOps services to customers—all in one unified platform.

See your unified cloud truth

Get a personalized demo of your actual hybrid cloud data normalized and reported in under 30 minutes.
