

KEY USE CASE

ACCELERATE SECURITY

Build security in so users don't even know it's protecting

CLOUDBOLT **BUILDS SECURITY INTO THE WORKLOAD**, REMOVING HUMAN ERROR

THE CHALLENGE

78% AGREE CURRENT CLOUD APPROACHES HAVE CREATED NEW SECURITY VULNERABILITIES

From misconfigurations to zombie VMs to shadow IT to permission errors, SecOps has a full plate and the ease of multi-cloud accessibility raises the bar even further in terms of risk, compliance, and security!

WATCH A SHORT VIDEO 

THE SOLUTION

GUARDRAILS YOU NEED WITHOUT BEING CONTROLLING

Stop relying on developers to “remember” to make their cloud work secure. You can rest easier knowing it's built in properly every time – automatically – and that the right people have access to the right things.

-  Remove human errors
-  Security is built-in to the workload
-  300 security compliance checks
-  Auto-discovery of unknown workloads
-  Centralized role-based access control
-  Accelerate the adoption of ANY tool

Developers are overwhelmed by the amount of security configurations that are needed to secure the cloud – especially in Financial Services which is so highly regulated. With CloudBolt, they **no longer have to be security experts or worry about creating vulnerabilities** for the organization.”

- SVP Infrastructure & CISO, National Financial Company

ABOUT US

IT TAKES A **FRAMEWORK**

CloudBolt offers a comprehensive, award-winning cloud automation, visibility, and governance framework specifically built to stitch together your disparate multi-cloud, multi-tool, multi-team world and bring order to your infrastructure chaos. CloudBolt has systematically built capabilities that benefit everyone across an enterprise – ITOps, DevOps, SecOps, and FinOps – by enabling:

- Clarity into multi-cloud spend with robust reporting that enables real optimization
- Self-service IT that truly is automated (no expertise required)
- Guardrails for better governance that ensure compliance and increase your security posture
- Reusability of proven best practice elements, blueprints, and code, stop reinventing the wheel across teams

Our framework allows you to unify and simplify – today and tomorrow. Future-proof your cloud strategy with CloudBolt.

THE STATISTIC

MULTI-CLOUD REPRESENTS THE **GREATEST EXPANSION OF THREAT SURFACE EVER**

With cloud, the perimeter is all but gone. A single misconfiguration by someone who isn't even a security expert and thinks about security as an after-thought can have devastating consequences. CloudBolt helps make clouds safer.
