

KEY USE CASE

ACCELERATE THE TOOLS YOU LOVE

Allow devs choice – right tool for the job – with oversight and control

“CLOUDBOLT ALLOWS US TO MOVE FASTER WITH TERRAFORM THAN PREVIOUSLY WITH TERRAFORM ALONE.”

– Head of Cloud Engineering and Infrastructure, Global Entertainment Company

THE CHALLENGE

TOO MANY TOOLS, TOO MUCH TO LEARN, NOT ENOUGH PEOPLE

Terraform, Ansible, Kubernetes, or “the next open-source star” – the continual adoption of the next favorite tool makes governance, usage tracking, cost visibility, automation, and dev productivity infinitely more difficult. There are steep learning curves to proficiency and teams rarely share what works best for reuse. Are the tools that promised acceleration actually slowing everything down? With CloudBolt they won't.

HOW WE CAN HELP 

THE SOLUTION

AUTOMATION, GOVERNANCE, AND VISIBILITY FOR ALL YOUR TOOLS IN ONE PLACE

Every dev team makes different cloud and tool choices, Manage the mess and control the chaos while still offering choice. CloudBolt makes it simple to stitch it all together and reduce the expertise required.

-  Use the tools you want
-  Reduce the learning curve
-  Pull disparate systems together
-  Manage all tools in one place
-  Push button simplicity

“

At first, I think developers were scared of what we were implementing. There was fear that we were locking them out or that they were going to lose control. But over time they've realized that we're taking away the mundane administrative tasks. **They can focus their talents on developing.**”

– SVP Infrastructure & CISO, National Financial Company

ABOUT US

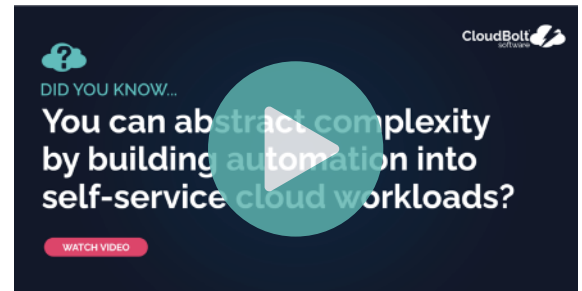

IT TAKES A **FRAMEWORK**

CloudBolt offers a comprehensive, award-winning cloud automation, visibility, and governance framework specifically built to stitch together your disparate multi-cloud, multi-tool, multi-team world and bring order to your infrastructure chaos. CloudBolt has systematically built capabilities that benefit everyone across an enterprise – ITOps, DevOps, SecOps, and FinOps – by enabling:

- Clarity into multi-cloud spend with robust reporting that enables real optimization
- Self-service IT that truly is automated (no expertise required)
- Guardrails for better governance that ensure compliance and increase your security posture
- Reusability of proven best practice elements, blueprints, and code, stop reinventing the wheel across teams

Our framework allows you to unify and simplify – today and tomorrow. Future-proof your cloud strategy with CloudBolt.

THE STATISTIC

THE MARKET AGREES: SOMETHING HAS TO SIT ABOVE ALL THIS

In a recent global study, 88% of respondents agreed that “in order to realize the full value of cloud, what is needed is an overarching solution that interconnects all of the various platforms, tools, and clouds, and provides clear visibility and governance across all of it.”
