

RISING STAR: CLOUDBOLT SOFTWARE

Overview

CloudBolt Software is a HCMP vendor based in Rockville, Maryland. It has more than 150 employees spread out in multiple locations in the U.S., as well as offices in London; Pune, India; and Melbourne, Australia. It caters to all sizes of enterprise customers, which reside mostly in the U.S. It helps enterprise IT deploy and manage their hybrid, multi-cloud environments, and other IT resources, while empowering its developers with self-service IT.

Strengths

Robust multi-cloud management platform: CloudBolt's solution is an intuitive and comprehensive platform that enables all end-users to orchestrate their cloud resources, without the need to have a technical background. It offers a user-friendly platform, which is highly customizable, and is capable of tracking and monitoring every aspect of the IT environments without compromising on the security. CloudBolt also offers professional and implementation services for the platform, which include frameworks for planning, solution design, delivery and service completion to simplify its client's product adoption. The platform also offers powerful modules for ITOps, CloudOps, FinOps and DevOps teams to visualize security threats and compliance gaps and automatically optimize cloud costs.

Quick integration: CloudBolt's solution quickly connects to more than 20 cloud providers, along with private clouds or on-premises infrastructure to create blueprints for orchestration. The resources are logical sets that are defined by technology, geography, role or any custom attributes, where admins can tailor the resource allocation as per their requirements. Users can also plug CloudBolt Software into existing runbook automation flows to interoperate with complicated businesses and IT requirements. It also offers powerful solutions for codeless integrations, coupled with a policy-based approach.

Caution

Although CloudBolt has grown substantially since last year, it still has lower revenues generated from its CMP when compared to its peers. CloudBolt needs to invest in its business development team in various locations across the globe, to bring in new clients and improve its market share globally.

2021 ISG Provider Lens™ Rising Star

CloudBolt offers an intuitive and flexible CMP, which helps enterprises of all sizes achieve high level of operational efficiencies.
