

## COMPARISON GUIDE

# CloudBolt vs CloudCheckr by NetApp

## Overview

Choose CloudBolt over CloudCheckr for a feature-rich, flexible, and user-centric cloud management solution that caters to the diverse needs of your organization. CloudBolt delivers a comprehensive platform that supports various cloud operation use cases, including self-service, automation, and financial management. It is designed to work seamlessly with major cloud providers such as AWS, Azure, GCP, and VMWare. CloudBolt's innovative cost management platform is crafted to empower FinOps teams, enabling them to effectively manage and optimize cloud costs at scale.

	Why Choose CloudBolt?	CloudBolt	CloudCheckr
<b>Cost Visibility &amp; Management</b>	CloudBolt Cost Management provides the ability to quickly find answers to any question using persona-based dashboards and our rich reporting engine, backed by customization for even the most complex scenarios.	<ul style="list-style-type: none"> <li>Multi-cloud dashboards and tailored functional reporting options mean that team members have access to relevant information and actionable insights across clouds.</li> <li>CloudBolt has advanced reporting profile configuration options that allow for granular margin &amp; discount customization, currency conversion, SSO &amp; access control policies, and that's just scratching the surface.</li> </ul>	<ul style="list-style-type: none"> <li>Disparate reporting experience across clouds; no true multi-cloud "pane of glass" for users.</li> <li>Reporting functionality limited at scale leads to manual efforts to achieve analysis across estate.</li> </ul>
<b>Optimization Workflows</b>	CloudBolt Cost Management allows FinOps teams to scale by implementing policy-based automation that helps engineers take action to remediate cloud cost recommendations.	<ul style="list-style-type: none"> <li>Use multiple data sources (Cloud Providers, ServiceNow, &amp; more) to automatically identify workload owners and specify optimization owners, reducing the lift on Cloud Financial Management teams.</li> <li>Create policies that automatically assign / notify and track optimizations across the organization using common tools including, Teams, Email, Slack, ServiceNow, and more. Automatically act when approved and allow your Cloud Financial Management teams to track progress at scale.</li> </ul>	<ul style="list-style-type: none"> <li>End-to-end functionality requires multiple platforms in product suite: "CloudCheckr CMX", "Spot Eco", "Elastigroup", and "Ocean".</li> </ul>

	Why Choose CloudBolt?	CloudBolt	CloudCheckr
<b>Automation</b>	CloudBolt's automation capabilities help your team scale by orchestrating common Financial Management tasks without the overhead.	<ul style="list-style-type: none"> <li>Quickly generate estate-wide assessments that detail financial trends, cost drivers, categorical optimization opportunities, and more.</li> <li>Easily model reservation savings across your cloud portfolio to secure a lower price. Distribution controls and monitoring of usage patterns to notify you when to adjust.</li> </ul>	<ul style="list-style-type: none"> <li>Automation features primarily designed for service providers managing multi-cloud billing workflows.</li> <li>Third party automation tooling required for Enterprise use-cases.</li> </ul>
<b>Platform Integration</b>	We are dedicate to providing an integrated enterprise solution for managing your organization's cloud spending that works with all architectures.	<ul style="list-style-type: none"> <li>CloudBolt natively connects with major cloud providers and popular enterprise software like ServiceNow, Slack, Microsoft Teams and more.</li> <li>When you need to go beyond our native integrations, our extensive API framework ensures seamless integration with your existing systems.</li> </ul>	<ul style="list-style-type: none"> <li>Heavy focus on integration to the broader CloudCheckr ecosystem limits extensibility.</li> </ul>
<b>Pace of Innovation</b>	Our clients tell us that CloudBolt noticeably outpaces the competition's rate of innovation.	<ul style="list-style-type: none"> <li>Typically, we release 40-50 major and 100+ minor releases each quarter.</li> <li>2-4 week feature development cycles with a strong focus on customer feedback.</li> </ul>	<ul style="list-style-type: none"> <li>Slowing pace of innovation post-acquisition by NetApp.</li> <li>Traditional development focus on AWS functionality compared multi-cloud (Azure, GCP, &amp; VMWare).</li> </ul>

## Key features

### Next-generation analysis with CloudBolt Service Adviser

Effortlessly discover overprovisioned, underutilized, or misconfigured IaaS and PaaS instances using CloudBolt's Service Adviser. Go beyond traditional recommendations by actively analyzing resource usage and performance against cloud spending to quickly pinpoint inefficiencies.

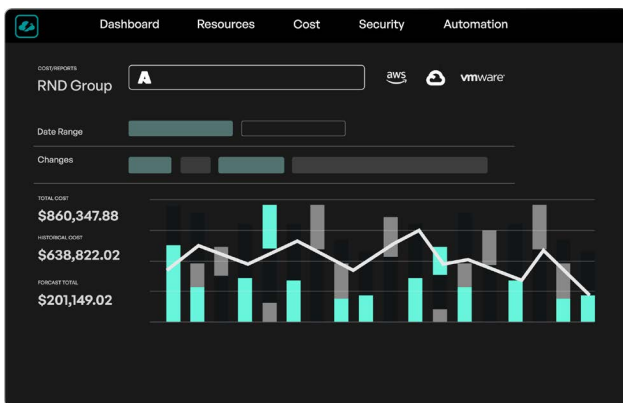

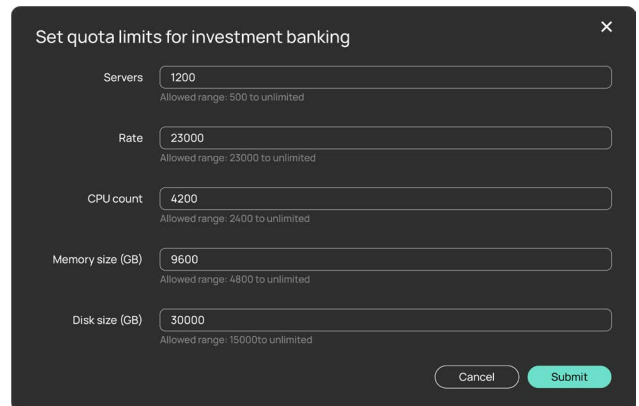

### Increase efficiency with automated workflows

CloudBolt’s automation capabilities help you scale cost optimization efforts without the overhead. Automate the cleanup of unused resources, create power schedules, rightsize resources, and perform other cost-reducing activities right from the console.

### Drive accountability across the business

Set cost guardrails and specify what teams can spend to ensure budget compliance. Budget and report notifications can be setup for any scope using Email, Microsoft Teams, Slack, ServiceNow and more. No more hunting down rogue teams and no more having to guess where the extra costs are coming from.

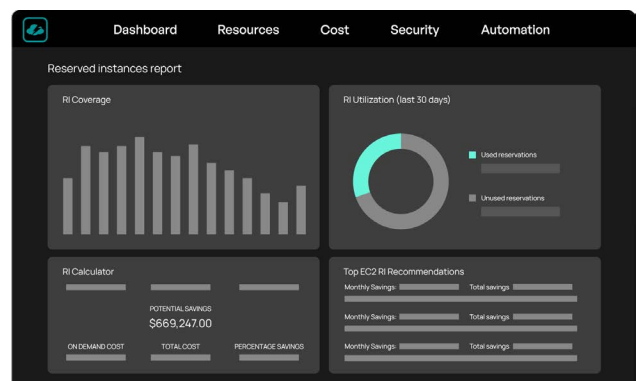

### Automated cloud assessments

CloudBolt generates estate-wide assessments that detail financial trends, cost drivers, categorical optimization opportunities, and more.

### Control reservations, savings plans, and more

Easily model reservation savings across your cloud portfolio to secure a lower price. Distribution controls and monitoring of usage patterns to notify you when to adjust.

## What our customers are saying

Having one central multi-cloud solution to get visibility over everything was essential!”

- Justin Dolly, CSO & CIO of Sauce Labs

We were surprised at how few vendors offer both comprehensive infrastructure cost management, automation, and even governance capabilities. The features and increased levels of support CloudBolt provides will allow my team to spend more time focusing on outcomes.”

- General Manager of Services at Data#3

From application developers to senior leaders, our clients have come to love the CloudBolt platform compared to their existing manual reporting processes. After deployment, we typically see a noticeable uptick in involvement in cost-related activities across the business.”

- Bill Meeks, Azure Practice Lead, Marquam

We are seeing the benefit across the organization. With CloudBolt, our footprint in the cloud is increasing, but our **overall spend is less.**”

- SVP of Technology Services & CISO
